$\{(\text{Archie}, ([\#42], [\text{score}], \mathbf{9}, 2), 3, 1)\}$

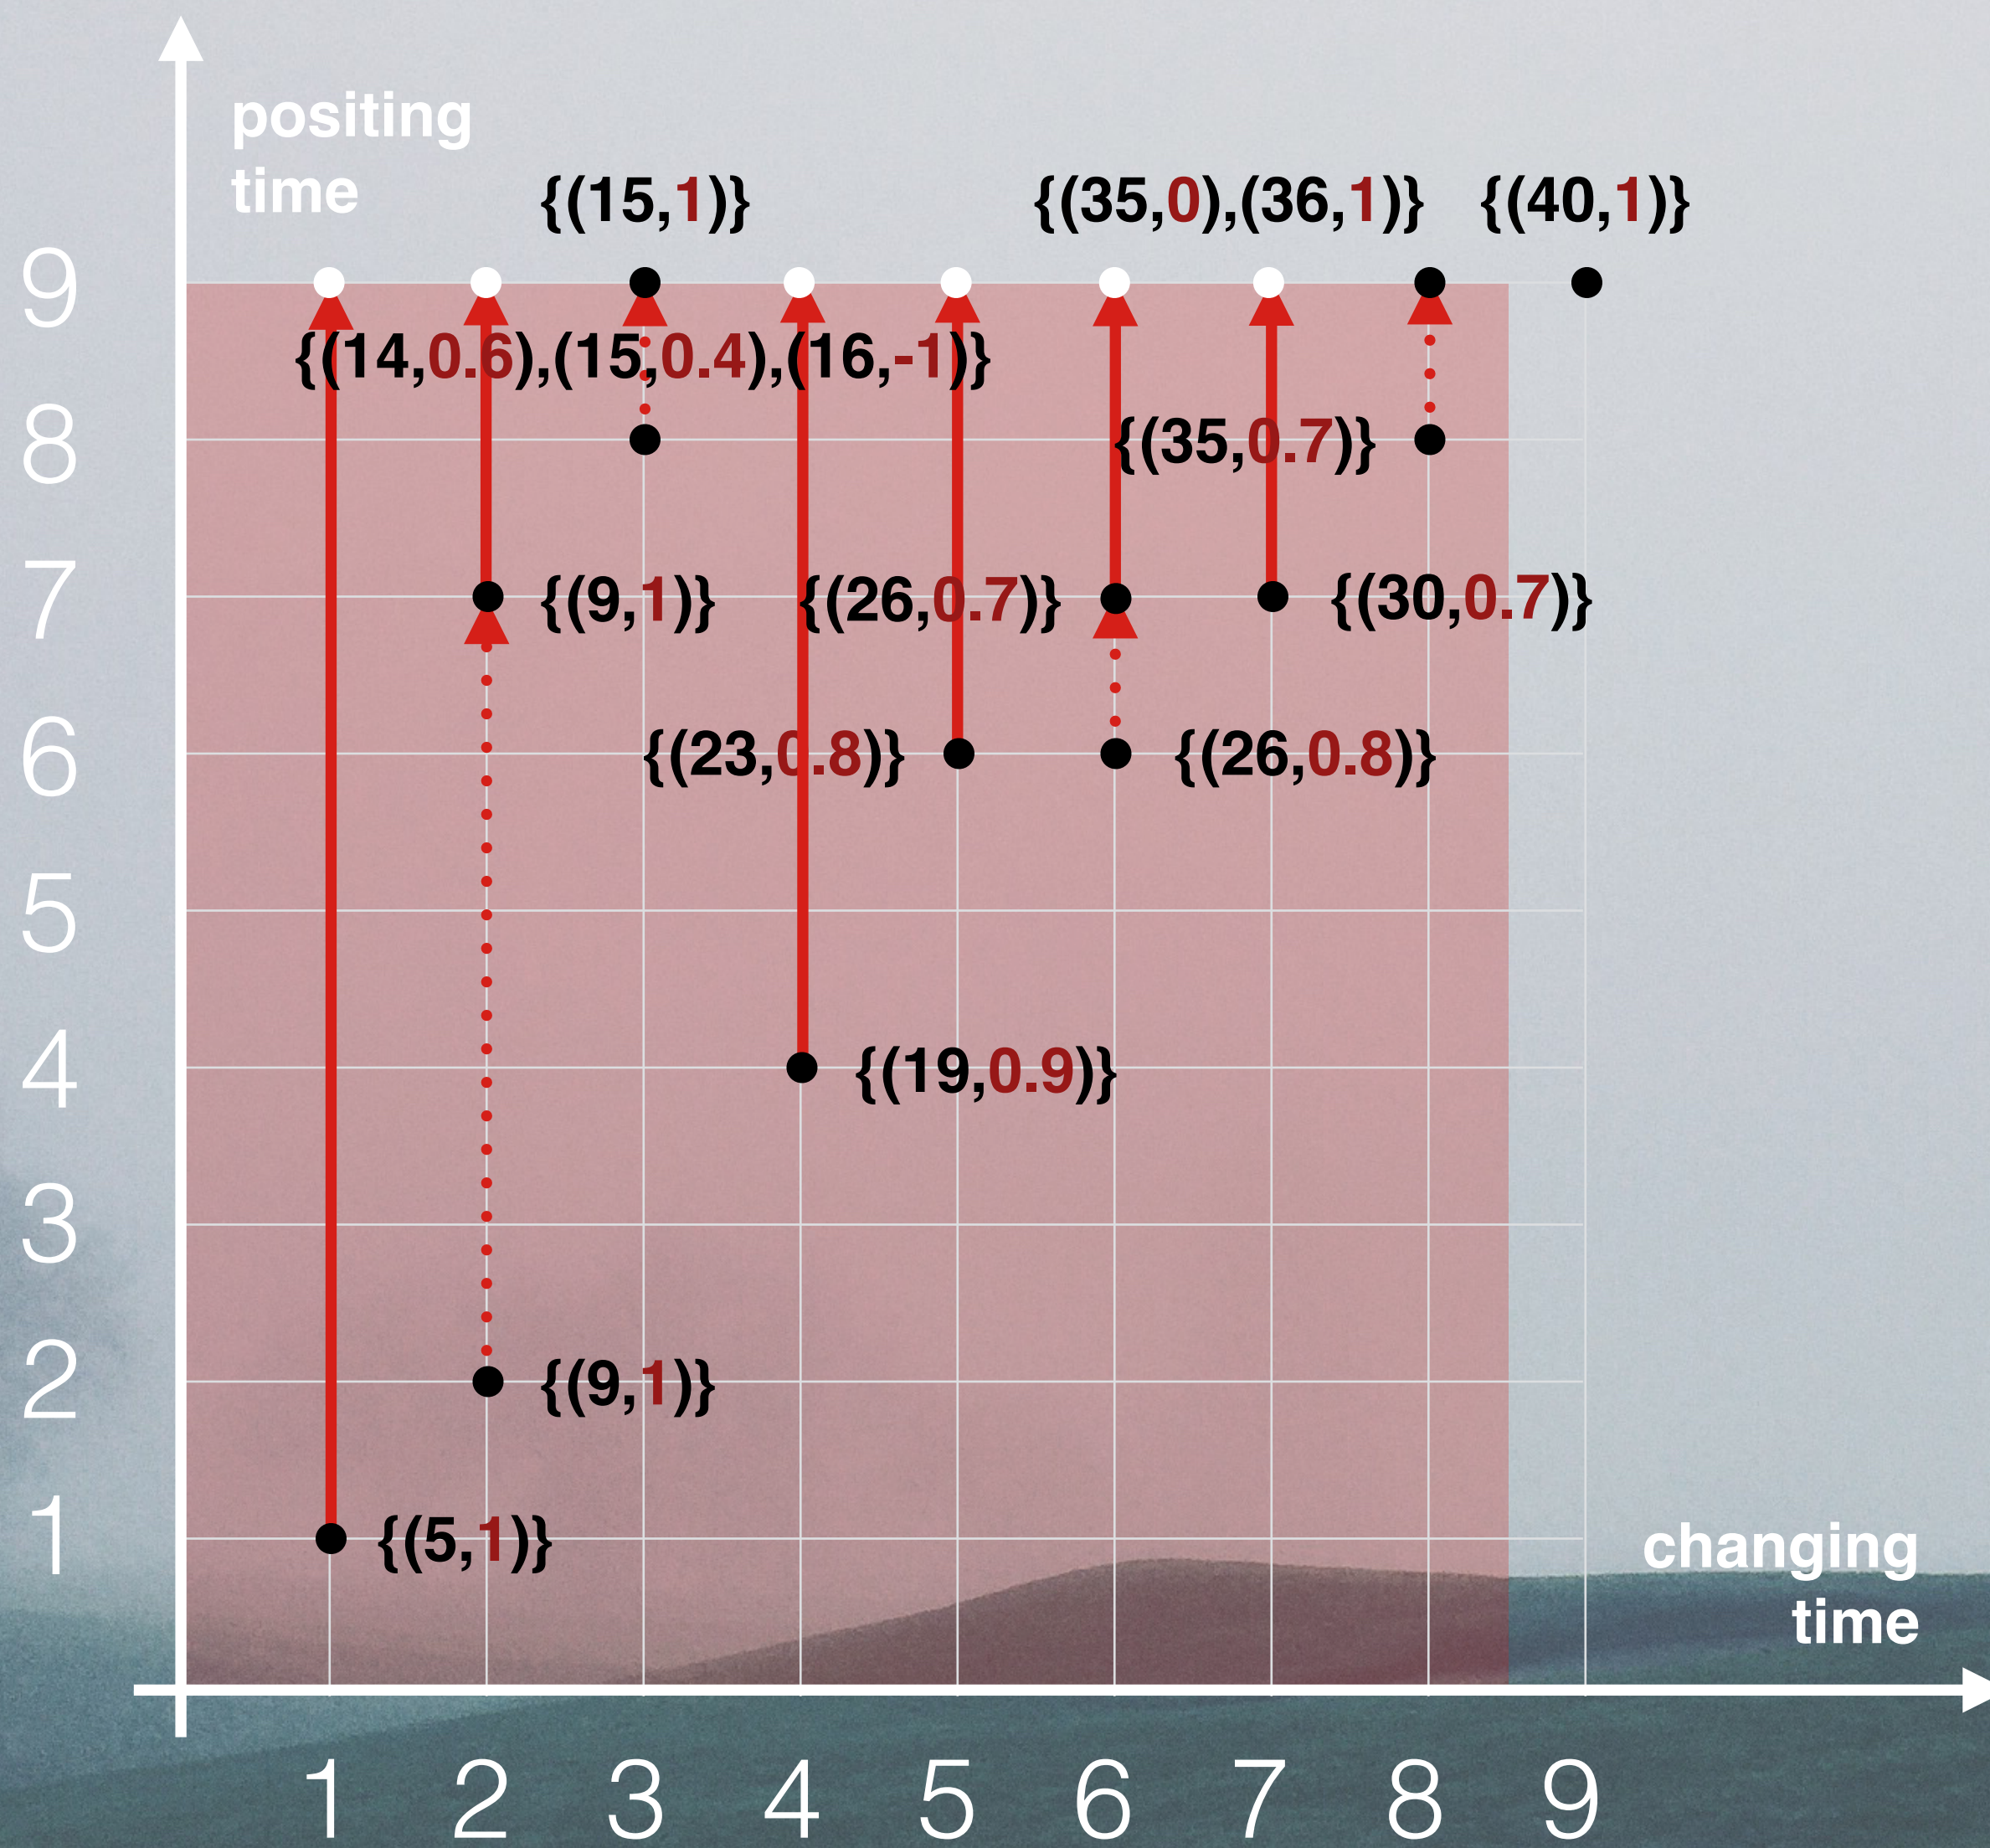

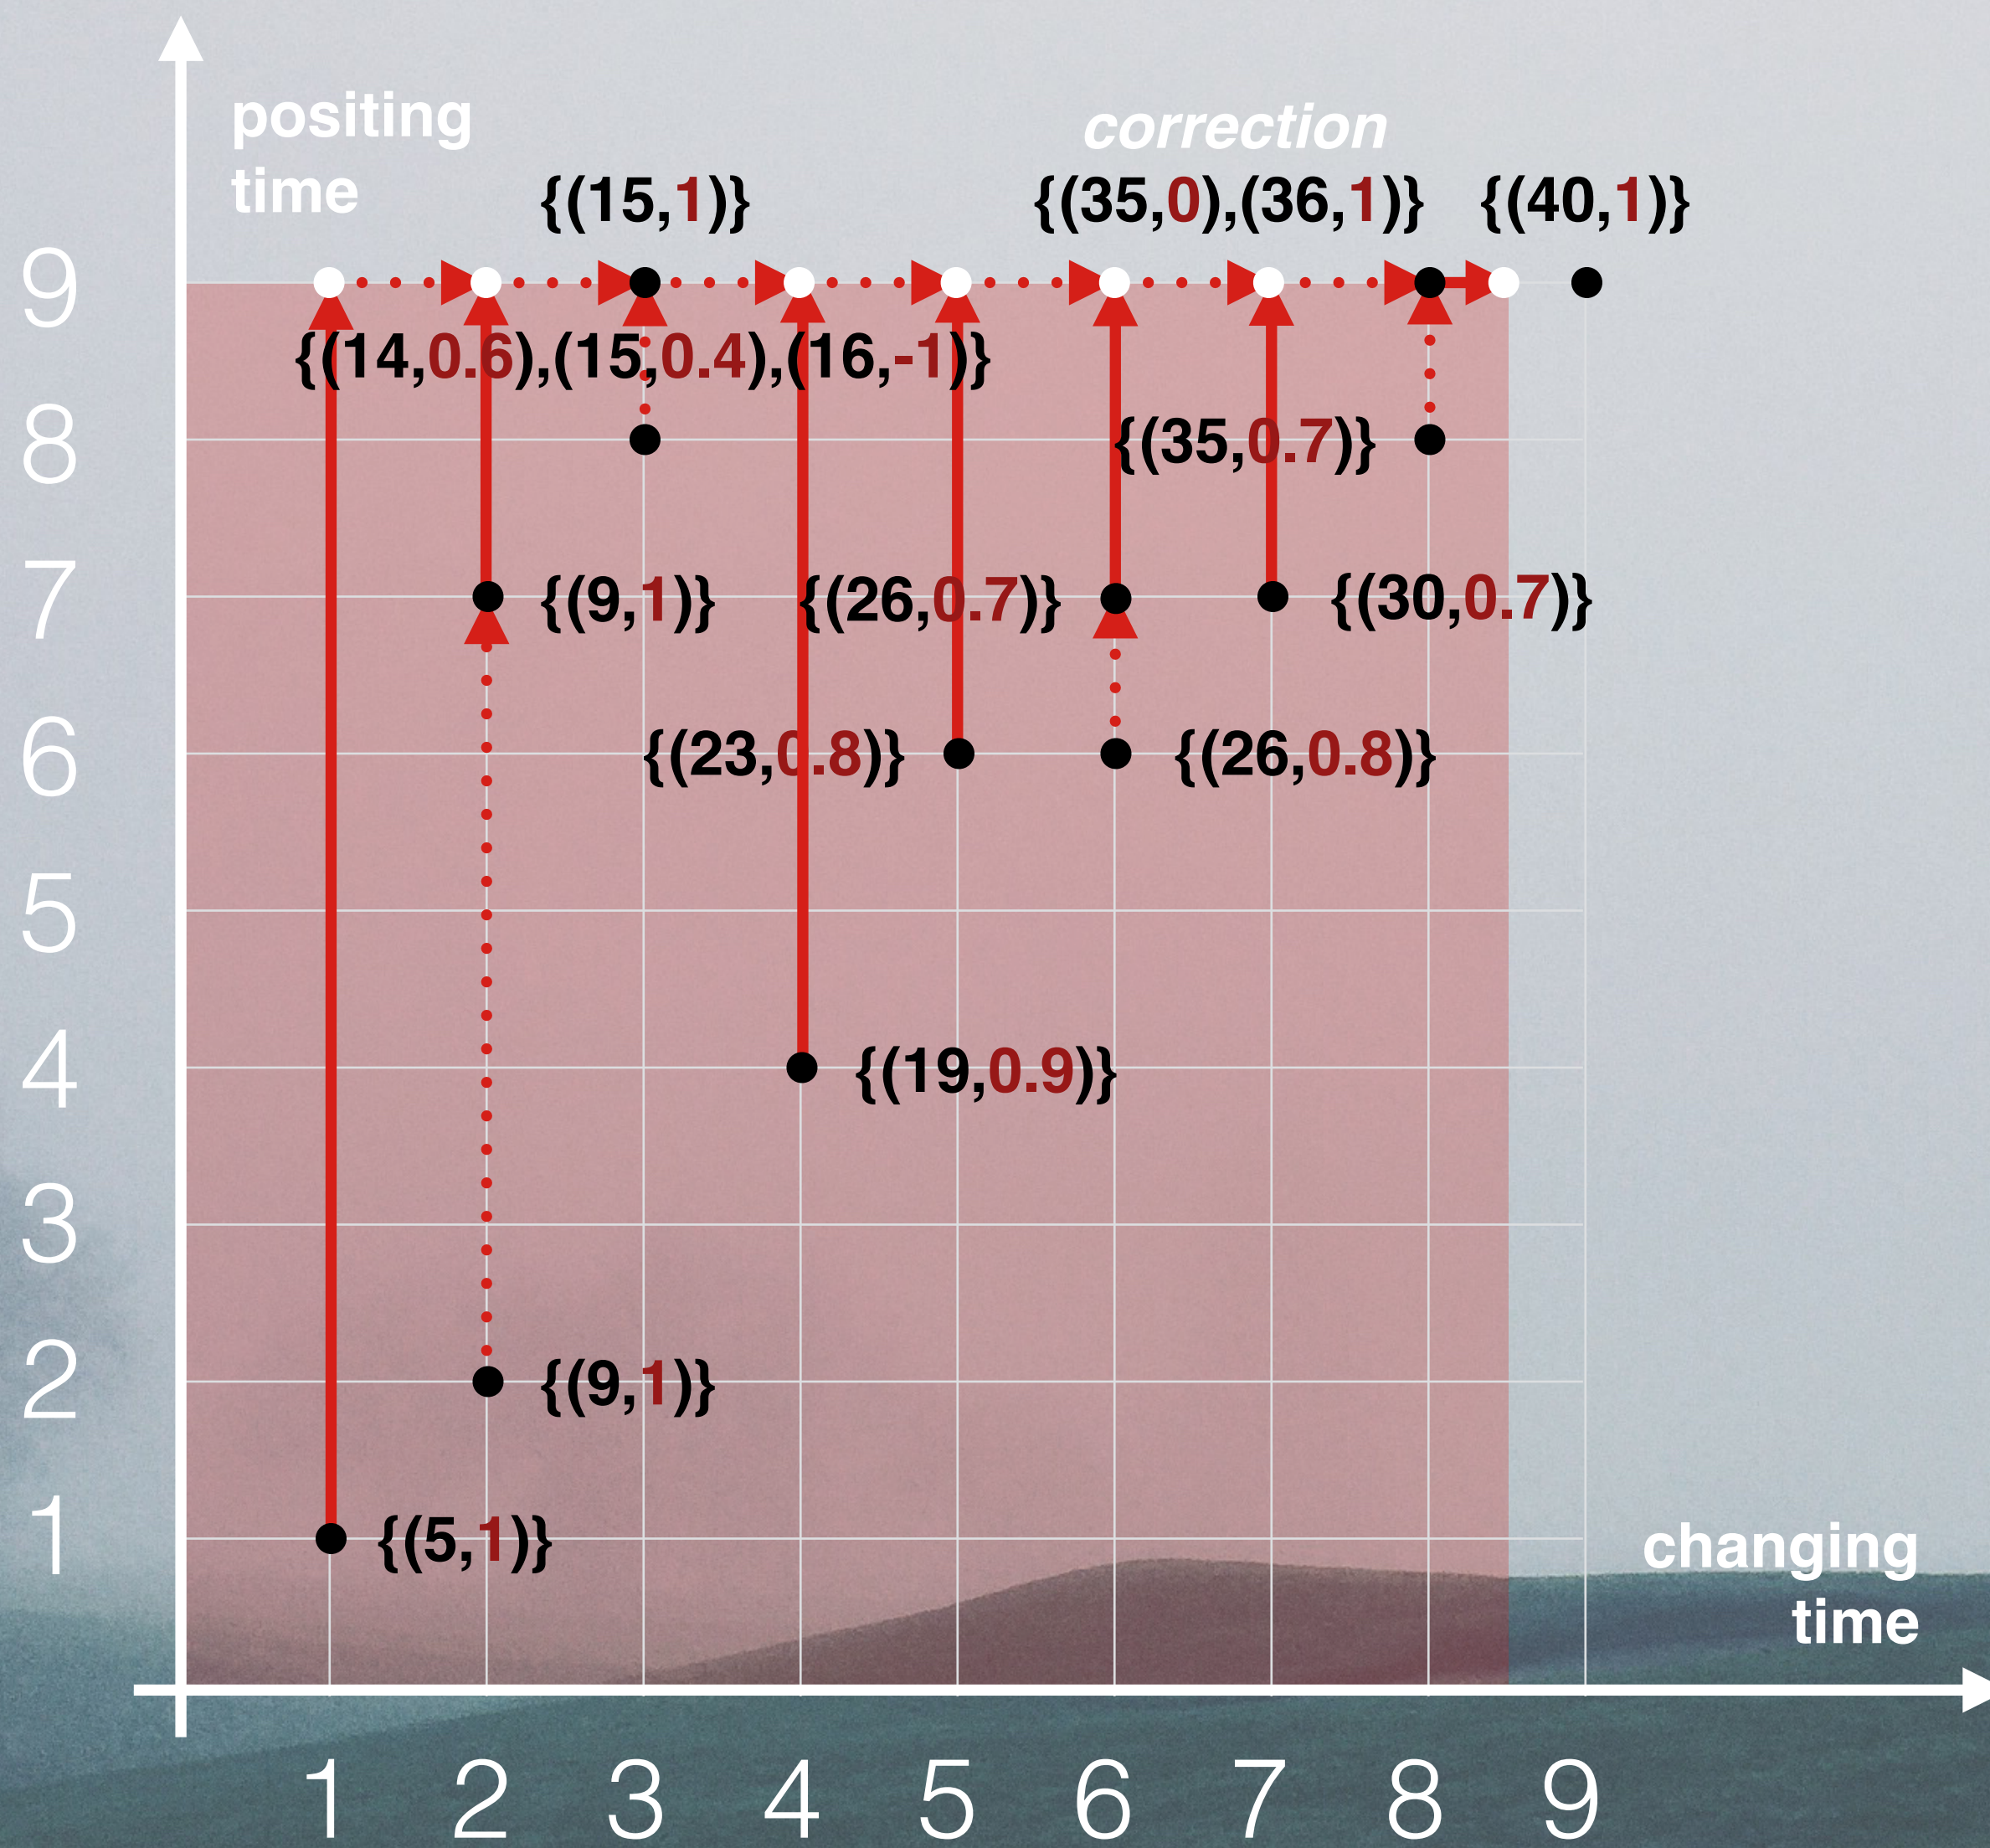

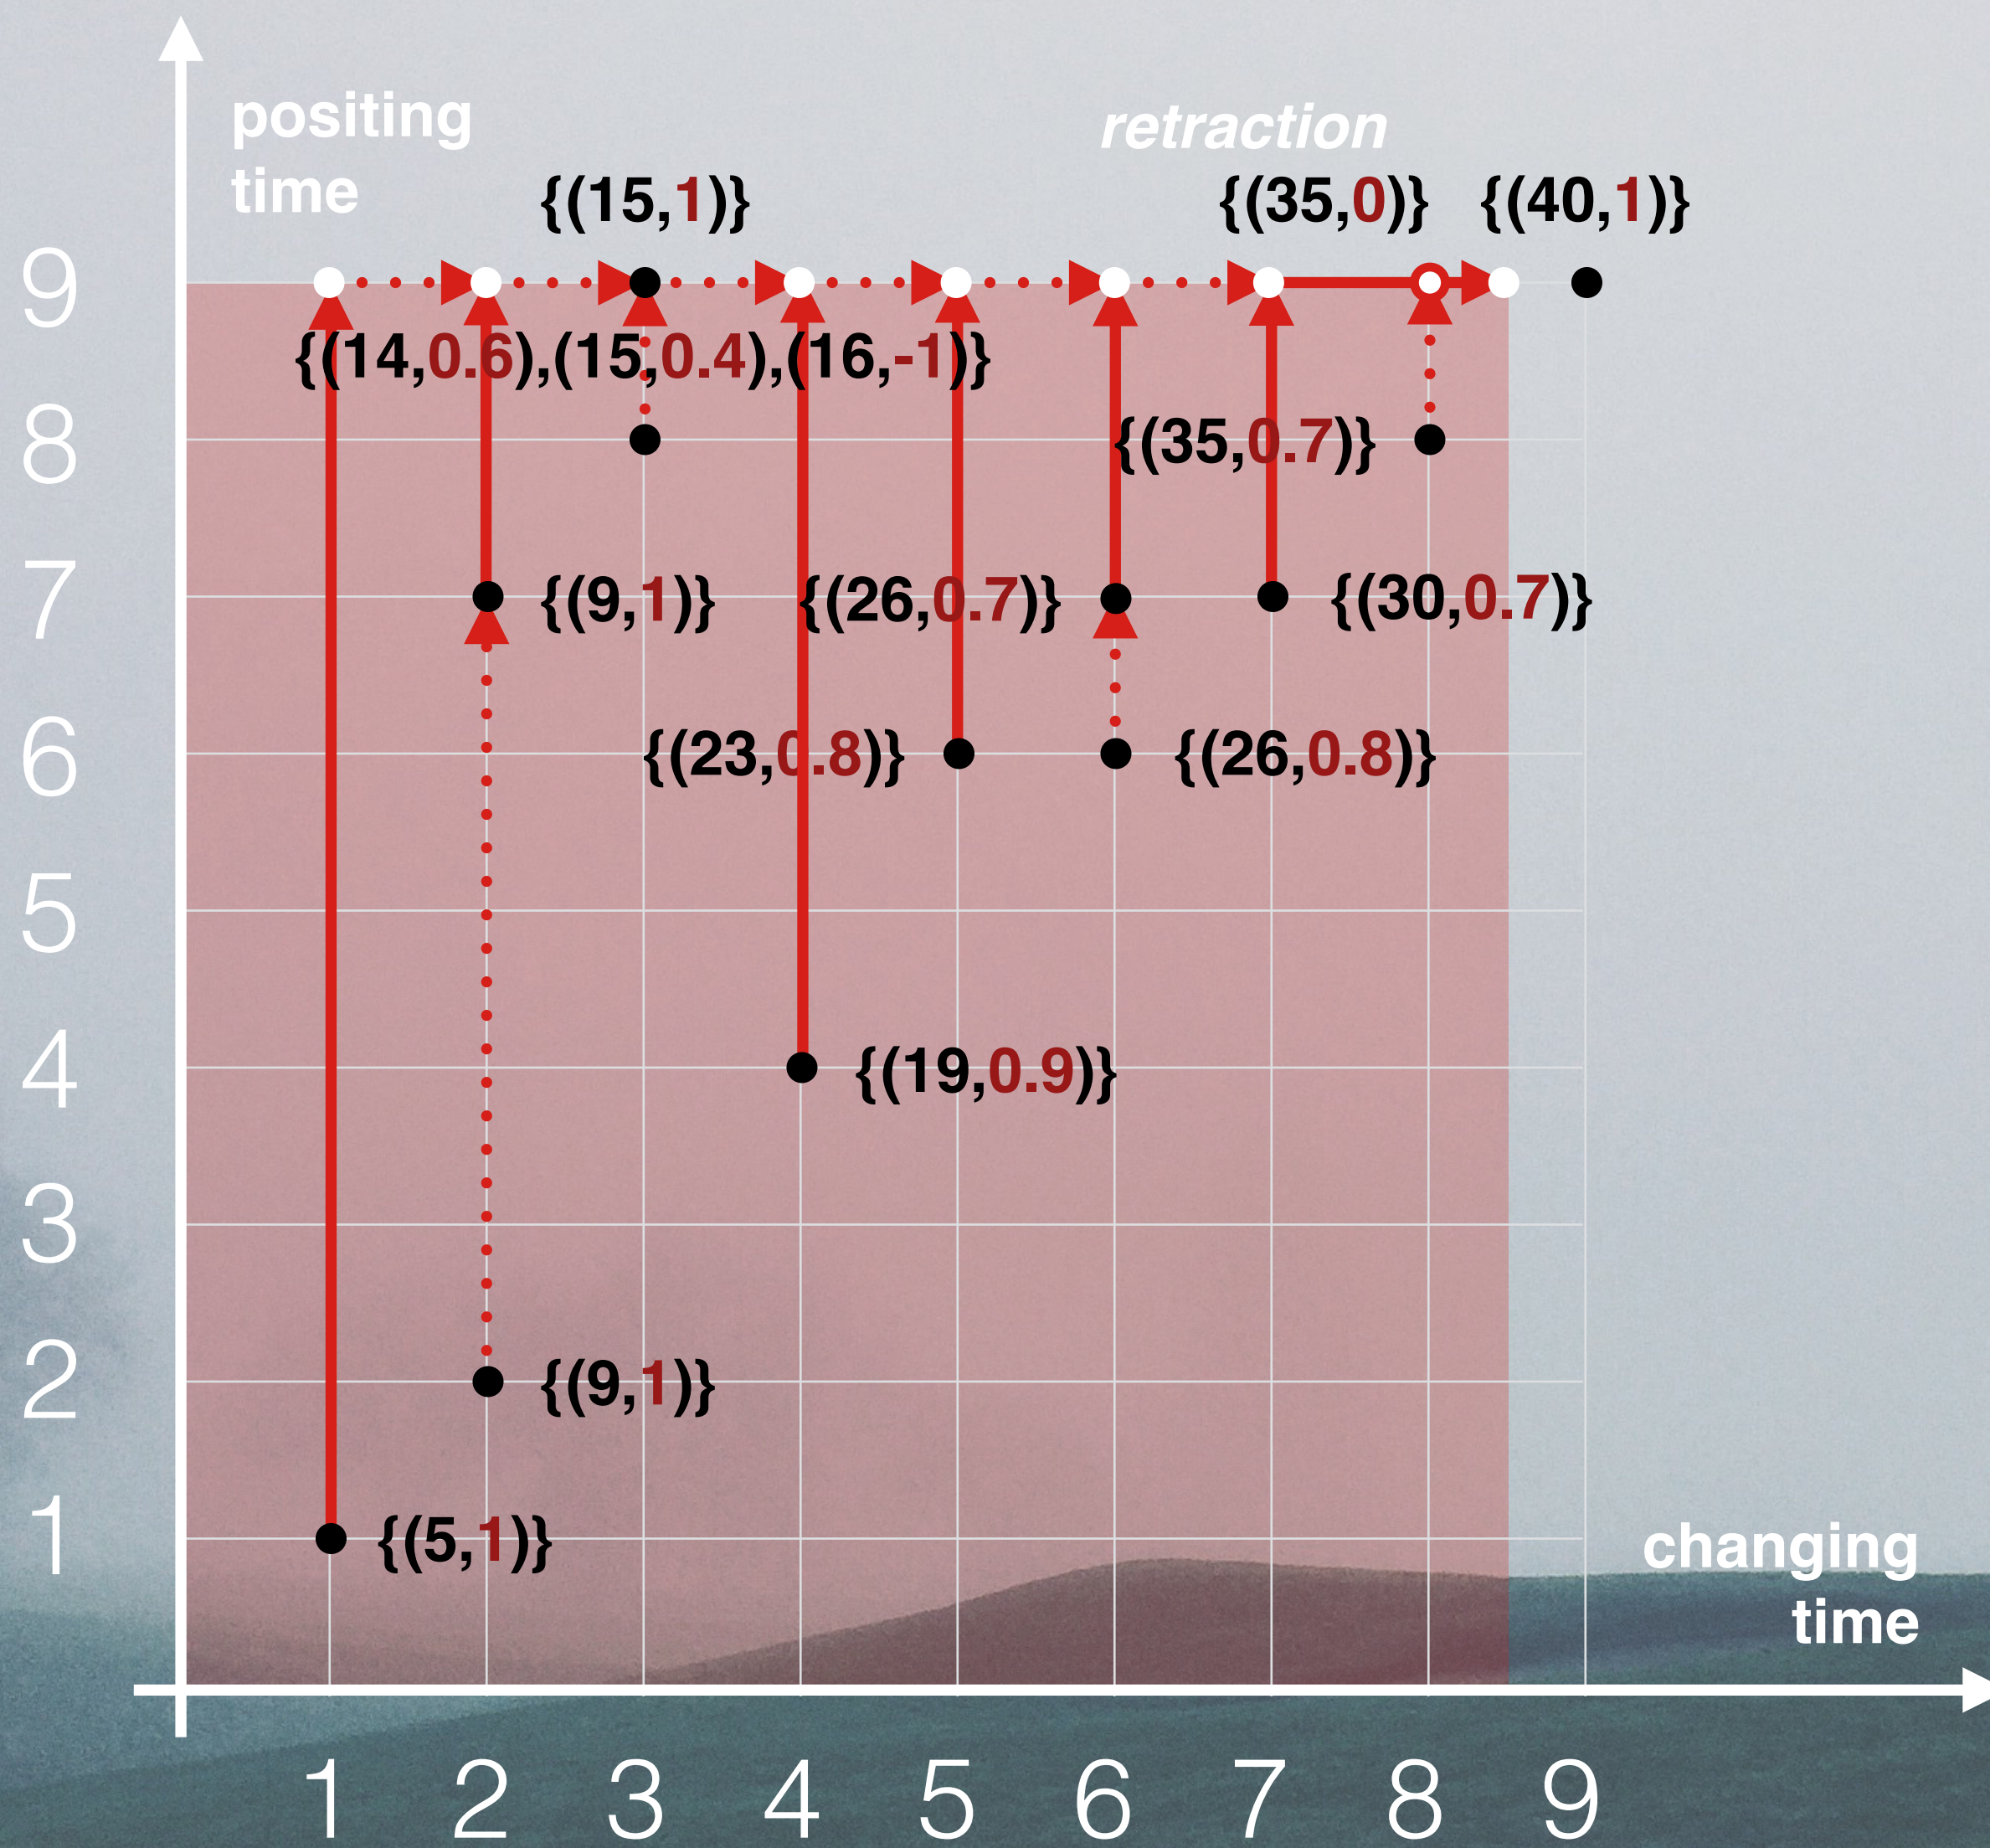

$\{(\text{Archie}, ([\#42], [\text{score}], \mathbf{15}, 3), 9, 1)\}$

$\{(\text{Archie}, ([\#42], [\text{score}], \mathbf{36}, 8), 9, 1)\}$

$\{(\text{Archie}, ([\#42], [\text{score}], \mathbf{30}, 7), 9, 0.7)\}$

I am sure Archie
is wrong about
his score of 36
after the eighth.

I think
it should
have
been 37.
